

1st Year Essentials: A Simple DIY Guide for New Small Business Owners

I wrote this guidebook of essentials, for new entrepreneurs to essentially cut through the vast world of information that seems to exist on the internet. The spirit of this audiobook is to be helpful and share things that I know from real world experience. I don't want you to fail in your first year. I don't want you to fail any year, but especially the first. It is such a hard heartbreak to get over. The first year is when your excitement and drive is at its peak, and it should also be the time that you setup a workflow that actually helps you stay ahead of the game. That is what this Do-It-Yourself guidebook will help you do, in a very no-nonsense, straightforward kind of way, unlike a University approved entrepreneurship and small business development textbook. This audiobook is meant to be functional and based on years and years of experience operating small businesses and assisting entrepreneurs in the real world - the everyday, nitty-gritty stuff that keeps us compliant and able to see a growing bottom line through do-it-yourself means. Also, the fact that I have helped many other small business owners who were overwhelmed get caught up with their books, tax reporting and corporate paperwork and helped them have a streamlined workflow that is compliant for their industry makes me know that this will work for you. But only if you do what is recommended. Implement the suggestions, email me and ask questions, bring your business just one level up from where it is now and see the profitable difference and the time and stress it will save you to do this stuff. You will be glad you did.
