

A History of Syria in One Hundred Sites

This volume presents the long history of Syria through a journey of the most important and recently-excavated archaeological sites. The sites cover over 1.8 million years and all regions in Syria; 110 academics have contributed information on 103 excavations for this volume. Based on these contributions the volume offers a detailed summary of the history of Syria, a history as important as any in terms of the development of human society. It is hoped that this knowledge will offer not only an increased understanding of the country but also act as a deterrent to the destruction of Syrian cultural heritage and facilitate the protection of Syrian sites.
