

Advances in Non-Verbal Communication: Sociocultural, clinical, esthetic and literary perspectives

This volume on nonverbal communication studies, the most multi- and interdisciplinary contribution to this field in almost twenty years, offers numerous suggestions for further research in many hitherto unexplored areas. The twenty contributions include the most recent theoretical and empirical crosscultural studies of gestures from historical, communicative and sociopsychological perspectives. In addition the volume presents novel psychological and clinical studies of nonverbal behaviors in connection with, for instance, aphasias and childrens experience of artificial limbs. A whole section is devoted to nonverbal communication in literature and literary translation, and a discussion of art and literature, which opens new avenues for literary analysis and a better understanding of reading as a recreational experience. A unique feature is a discussion of Nonverbal Communication Studies as an academic area (including detailed outlines of three current courses), complemented by an extensive bibliography.
