

Against the Cold War: The History and Political Traditions of Pro-Sovietism in the British Labour Party, 1945-1989 (International Library of Political Studies)

Few historians, including Left-wing scholars and writers, have a good word to say about British Members of Parliament sympathetic to the Soviets--the neo-Stalinist Left, crypto-Communists, left-wing gadflies. Much has been published on Soviet spies and their connections with Labour MPs but *Against the Cold War* debunks this popular literature and shows in detail the relationships between the MPs and their handlers. Lilleker shows the largely well-meaning attempts on the part of British MPs to develop a coexistence with the Soviet bloc--both culturally and politically--and to change negative perceptions of the Soviets. Through detailed analysis and extensive research he emphasizes that far from being a danger to the state, as has been generally accepted, these Labour MPs were largely innocent and ineffectual.
