

The Twelfth Annual Battery Conference on Applications and Advances: Proceedings of the Conference Held at California State University, Long Beach, Long Beach, California 14-17 January 1997

New developments in high-performance batteries for electric vehicles, airplanes, spacecraft, laptop computers, and scientific instruments are reported in the proceedings. Papers describe small controllers that extend battery life by integrating charge and discharge current to start and stop charging. The session on uninterruptible power included technology for predicting battery failure before it happens
