

# Establishing Security and Stability in the Wider Black Sea Area: International Politics and the New and Emerging Democracies - Volume 26 NATO Science ... (Nato Science for Peace and Security)

In this publication possible ways to promote security cooperation in the Wider Black Sea Area are being addressed. The area holds major importance for Euro-Atlantic security. Strategically located at the crossroads of Europe, the Middle East and Central Asia, the region, after the dual NATO-EU enlargement in 2004-2007, became part of the periphery of the common Euro-Atlantic security system, with critical value for European energy security and the war on terrorism. The region faces a variety of security challenges, including regional conflicts, ethnic strife, terrorism, and powerful organized crime, while many of the countries have weak institutions, turbulent political systems, unstable economies and lack of democracy. In addition, the traffic of drugs to the West, the steady stream of militancy from the Middle East, and the energy lines from the oil and gas-rich regions of the East to an energy-hungry Europe gradually define the Wider Black Sea Area as a region urgently requiring political attention and investment in its security. This publication is intended to provide fresh ideas on the possible areas of security cooperation, even as the authors agreed that comprehensive, far-reaching policies are hard to attain in the near future. IOS Press is an international science, technical and medical publisher of high-quality books for academics, scientists, and professionals in all fields. Some of the areas we publish in: -Biomedicine -Oncology -Artificial intelligence -Databases and information systems -Maritime engineering -Nanotechnology -Geoengineering -All aspects of physics -E-governance -E-commerce -The knowledge economy -Urban studies -Arms control -Understanding and responding to terrorism -Medical informatics -Computer Sciences
