# Ethics

Benedictus de Spinoza was a Dutch philosopher. Benedictus de Spinoza is known for laying the groundwork for the 18th century Enlightenment and modern biblical criticism, including modern conceptions of the self and the universe, he came to be considered one of the great rationalists of 17th century philosophy, medieval thought, and ethics & morality. In Benedictus de Spinozas Ethics, he opposes Descartes mind-body dualism. Ethics earned Benedictus de Spinoza recognition as one of Western philosophys most important medieval thought thinkers and ethics and morality thinkers. In Ethics, the refined conceptions of medieval philosophy are turned against themselves and destroyed entirely by Benedictus de Spinoza. Ethics is often required reading for courses in politics & social sciences, philosophy, medieval thought, and ethics & morality.
