

Changing Governance of Research and Technology Policy: The European Research Area

This collection analyses and comments on the development of the ERA, which seeks to co-ordinate national research and advance European wide projects. The contributors include leading scholars of European integration and technology policy and high-level administrators. They discuss the potential impacts, benefits and limits to research and innovation policy within Europe both in the short and long term. Moreover, the debate about ERA is placed firmly in the context of the overall changes at the European level.
