

Feminisms, Empowerment and Development: Changing Womens Lives (Feminisms and Development)

The economic and political empowerment of women continues to be a central focus for development agencies worldwide; access to medical care, education and employment, as well as womens reproductive rights remain key factors effecting womens autonomy. This book explores what women are doing to change their own circumstances, and provides in-depth analysis of collective action and institutionalized mechanisms aimed at changing structural relations. Drawing on unique, original research and approaching empowerment as a complex process of negotiation, rather than a linear sequence of inputs and outcomes, this crucial collection highlights the difficulty of creating common agendas for the advancement of womens power and rights, and argues for a more nuanced, context based approach to development theory and practice. An indispensable text for anyone interested in gender and development.
