

Global Trends 2025: The National Intelligence Councils 2025 Project by National Intelligence Council

This report was prepared by the U.S. National Intelligence Council to show how key global trends might develop over the next 15 years to influence world events. Given many possible futures, it offers a range of possibilities. It will stimulate strategic thinking by identifying key trends, the factors that drive them, where they seem to be headed, and how they might interact. The report examines a small number of variables that will have a disproportionate influence on future events. (Note: this is a B&W reprint of the color original.)
