

Manual de Urbanismo (Bogota, 1939): Volume 1 (Studies in International Planning History)

Unlike European countries where the consolidation of town planning was based on legislative reforms, Latin Americas urbanismo mainly stemmed from urban plans for national capitals and metropolises. Austrian academic and planner Karl Brunner was hired in Chile, Colombia and Panama from the late 1920s to advise in the professional and academic domains, marking a shift from the so-called Ecole Francaise dUrbanisme (EFU) of Haussmannesque descent towards the Austrian-German Stadtebau. While coordinating the municipal office and plan for Bogota, Brunner translated his Manual de Urbanismo the first textbook published in Latin America about the new discipline and the first to incorporate examples from local cities. Based on his 1924 course at Viennas National Faculty of Architecture Brunners Manual emphasized the scientific system of the discipline. Brunner was the most influential figure of his time in the urban planning of the region, but has become overshadowed by Le Corbusiers and CIAMs prevailing influence after the Second World War. Complete with a supporting introduction written by Arturo Almandoz, this volume includes the full copy of the original Manual de Urbanismo with an Englishtranslation of the synthesis. Further materials, including an extract of Karl Brunners Problemas actuales de urbanizacion and an accompanying English translation of the text can be accessed at www.routledge.com/9781138778573
