

Organising Feminisms: The Micropolitics of the Academy (Womens Studies at York Series)

This study of feminism, equity and change in the academy is based on interviews with 40 feminist academics and students in Britain, Sweden and Greece. The research attempts to decode and disentangle gendered message systems and the matrix of power relations in the academy. It consists of feminist readings of the micro-processes of everyday practices. Change is interrogated in relation to feminist pedagogy, equity, organizational culture, policies and discourses of New Right reform, mass expansion and new managerialism.
