

Receptions of Antiquity, Constructions of Gender in European Art, 1300-1600 (Metaforms)

Receptions of Antiquity, Constructions of Gender in European Art, 1300-1600 presents scholarship in classical reception at its nexus with art history and gender studies. It considers the ways that artists, patrons, collectors, and viewers in late medieval and early modern Europe used ancient Greek and Roman art, texts, myths, and history to interact with and shape notions of gender. The essays examine Giotto's Arena Chapel frescoes, Michelangelo's Medici Chapel personifications, Giulio Romano's decoration of the Palazzo del Te, and other famous and lesser-known sculptures, paintings, engravings, book illustrations, and domestic objects as well as displays of ancient art. Visual responses to antiquity in this era, the volume demonstrates, bore a complex and significant relationship to the construction of, and challenges to, contemporary gender norms.
