

Religion, Politics and Society in Britain, 800-1066

Using a comparative and broad perspective, *Religion, Politics and Society in Britain 800-1066* draws on archaeology, art history, material culture, texts from charms to chronicles, from

royal law-codes to sermons to poems, and other evidence to demonstrate the centrality of Christianity and the Church in Britain 800-1066. It delineates their contributions to the changes in politics, economy, society and

culture that occurred between 800 and 1066, from nation-building to practicalities of government to landscape. The period 800-1066 saw the beginnings of a fundamental restructuring of

politics, society and economy throughout Christian Europe in which religion played a central role. In Britain too the interaction of religion with politics and society was profound and pervasive. There was no part of life

which Christianity and the Church did not touch: they affected belief, thought and behaviour at all levels of society. This book points out interconnections within society and

between archaeological, art historical and literary evidence and similarities between aspects of culture not only within Britain but also in comparison with Armenian Christendom. A. E. Redgate explores the importance of religious

ideas, institutions, personnel and practices in the creation and expression of identities and communities, the structure and functioning of society and the life of the individual.

This book will be essential reading for students of early medieval Britain and religious and social history.
