

## Japan and Russia: Three Centuries of Mutual Images

This volume recognizes the growing awareness of the importance of images in international relations, exploring the phenomenon over three centuries as it relates to Russia and Japan. The general perception of one country by another the stereotypical collective mentality is an historic phenomenon that continues to be a fundamental component in international relations at all levels, but especially in the political and business arenas, and remains an ongoing challenge for future generations. Bringing together international scholars from various disciplines, this innovative study focuses especially on modes of seeing and on the enigma of visual experience. It draws on numerous visual representations from propaganda posters and cartoons to artworks and films and to more recent media, such as television, the internet, pop-culture icons, as well as direct visual encounters. The volume raises questions of how different cultures observe, understand and represent each other, how and why mutual representations have changed or remained unchanged during the long history of Japanese-Russian interactions, what mental frameworks exist on both sides of the encounter; and how visions of otherness influence the construction of national, cultural and social identities.
