

## Into the Florida Wildrness

Non-Fiction: The book is based on fascinating first-hand accounts of life on the edge of civilization before Florida became a tourist and snowbird haven. The story is told in first person through the lively written diaries, photographs, and letters of three growing daughters of homeopathic doctors Mary and Louis Olds who lived on Marco Island from 1903 to 1920. Dr. Mary's challenge was to create a cultured home and educate her daughters in a place without roads, electricity, sewage, running water, hospitals, churches, or grocery stores. How do you preserve food without refrigeration? Wealthy and socially prominent northerners were attracted to their modest two-story home on the Marco River, becoming friends and sharing beach picnics and family suppers. The girls took pictures with their camera and developed the film themselves when they had ice! Names like Pinchot, Hornaday, Fielding, Dimock and Halderman float through the narratives like next-door neighbors.
