

Social Structure and Party Choice in Western Europe: A Comparative Longitudinal Study

This study is a comparative analysis of the relationship between social structure and party choice in eight West European countries. Oddbjorn Knutsen analyzes the comparative strength of social structural variables, and how these have changed from the early 1970s to the late 1990s. Other factors that are considered include for which parties the structural variables have the largest impact within the various party systems and across national contexts, and for which parties are the most significant change in support from various social groups found.
