

Soviet Workers and Late Stalinism: Labour and the Restoration of the Stalinist System after World War II

Donald Filtzer's new book is the study of industry and labor during Late Stalinism, covering the entire post-war period from 1945 to Stalin's death. He has uncovered a wealth of previously inaccessible archive material and analyzes it to show that the post-war period was one of political victory and historical defeat. This subtle and compelling study will be of interest to all scholars of Russian history.
