

The Bigger Message: Understanding Universal Context to Live Your Best Life Now Through Conscious Awareness

How do we create our world? What are we here for? Why do we matter? Why do things happen the way they do? What does it all mean? Finding the answers to these questions, and others, is what keeps us busy for most of our lives. The single pursuit of understanding how change works, what the bigger message is and how we create or deny our evolution is fascinating on every level. It is our individual and collective life purpose to discover and distill these huge questions into something that makes sense. The truth is that we must live in alignment with personal knowingness. Knowing what you want, and giving yourself the permission and resources to go after it, is a big part of why you are here. You are part of a greater whole that is only served by you being your true self. You being anything less takes away from everybody and everything else. It may seem a bit convoluted or counter-intuitive in the initial awareness of it, but when you understand that you ARE the power to create what you want, the world suddenly feels very different. Then, once you get that, what do you do with it? And how do you begin the process of intentional change by understanding the bigger message?(Note: Simultaneous device usage is unlimited for this book.)
