

## Elements in Political Science

This introductory textbook provides the ideal basis for students coming to Politics for the first time. The book opens with the question What is Politics? and then explores the four major elements : Comparative Institutions, Political Ideologies, Public Administration and International Relations. The book has been divided into five easy-to-use sections, each with a guide to literature for further study. Each chapter ends with two essay questions, making this an ideal teaching and revision tool.
