Fear of Crime among Inner-City African Americans (Criminal Justice: Recent Scholarship)
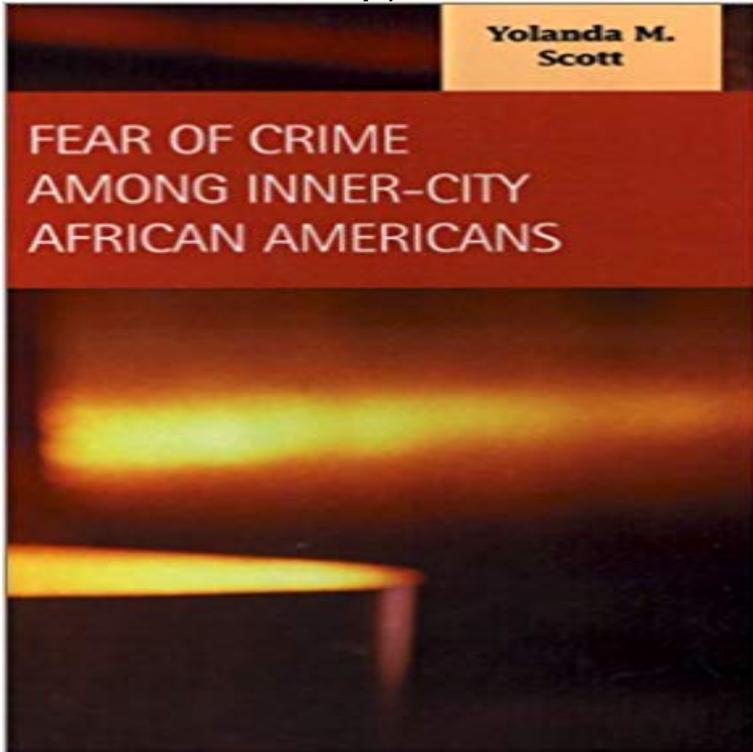

Yolanda M. Scott

FEAR OF CRIME AMONG INNER-CITY AFRICAN AMERICANS

Scott uses a systemic social-control approach to explain inner-city African Americans fear of crime from their perspective. Perceptions of neighborhood disorder (intra-community control) and views of local police (extra-community control) predict fear of local violent and property crime. Perceived crime-risk is a mediating factor between these fears and the two systemic factors. The systemic argument was supported: perceived local disorder and negative views of police increased residents fear of crime. Central to any reduction in inner-city African Americans fear of crime is their perception that there be strong intra- and extra-community control barriers between themselves and crime.
