

So you want to go into Business?- The Important Things You Need to Know About Money As an Entrepreneur

My work as an Entrepreneurial Development Consultant has afforded me a glimpse into all sorts of business ideas and ventures. Having been actively involved in every stage of the entrepreneurial process, I have gained first hand information on which businesses work and those that don't and why. I have come to appreciate the importance of financial literacy in the success or failure of businesses. I have often observed people getting excited about business ideas, jump to conclusions, blindly embark on business ventures and eventually crash; emotionally and mentally worn out and financially worse off than they were before they started off. The writing of this book has been motivated by my desire to share key financial knowledge that any aspiring entrepreneur cannot do without if they are to avoid the usual pitfalls. I believe financial literacy will improve the chances of the establishment of more successful businesses. In fact I hold the view that if one has the right knowledge; business does not have to be as risky as it is made out to be. So in this book I share, seemingly simple but vital financial knowledge such as profit, balance sheet, assessing business ideas, cash flow management, investment options, saving and debt capital from a practical business perspective. My hope is that after reading this book, someone will be better equipped to start and run a successful business venture with reduced risk of failure
