

The Transformation of Human Resource Management and Industrial Relations in Vietnam (Chandos Asian Studies Series)

This essential reference reviews recruitment and selection, training and development, performance management and union relations in a sample of multinational companies (MNCs) and local firms in Vietnam. It addresses the transfer of human resources management (HRM) systems across borders and the transformation of HRM practices in Vietnam in the context of a developing and transitional economy. The book extensively examines the attraction of younger generations to HRM systems in developing countries, the brain drain phenomenon and the local firms potentially losing commercial competitiveness in their own country. The book also reviews the catalyst role of MNCs in the management of human resources. Covers HRM in Vietnam an area barely covered in other books. Covers two of the most important types of enterprises in Vietnam: multinational companies and state-owned enterprises. Contributes to knowledge in a number of key areas including globalisation, social transformation, and diffusion of best practice by multinational corporations.
