

The Emancipation of English Women (Classic Reprint)

Excerpt from The Emancipation of English Women I have attempted to describe in the following pages part of the long struggle which women have made for their emancipation. I make no claim for impartiality, if by impartiality is meant want of sympathy with either side in the contest. I believe that the great change in the position of women, which is called the feminist movement, is, and has always been, on the whole good, and that the opposition to the various phrases of it is, and has always been, on the whole bad. This conviction, which has been produced as much by the study of historical material as by personal contact with the male ego, must inevitably have tinged this book. But I do not feel that I have therein departed from the strict duty of an historian. I am far from believing that an historian should make no attempt to preach a gospel; indeed, I can conceive no other reason why history should ever be written than that the author desires to establish some permanent good thing in the minds of his readers. It is as much his duty, as it is that of every other person who publishes his opinions, to pronounce judgment upon events, and upon those who take part in them, in accordance with his own ideas of right and wrong.
