

# Vocationalisation of Secondary Education Revisited: 1 (Technical and Vocational Education and Training: Issues, Concerns and Prospects)

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The book appears in the Springer book series on Technical and Vocational Education and Training: Issues, Concerns and Prospects and complements the International Handbook of Technical and Vocational Education and Training and other publications in the International Library of TVET all of which are publications of the UNESCO-UNEVOC International Centre for TVET in Bonn, Germany.
