

Americas Foreign Policy: Essays and Addresses (Classic Reprint)

Excerpt from Americas Foreign Policy: Essays and Addresses The essays and addresses gathered in this little Volume, with few exceptions, have been called out by public events during the past four years. For the courtesy of a permission to reprint certain of them, I return sincere thanks to the publications where they first appeared. They were adapted for special occasions, or to meet special questions, and differ much in style and form on this account. Nor has pains been taken to remove from them the references to time which they contain. Nevertheless, it is hoped that they have a certain unity and present value in a discussion of the foreign policy of the United States. For some years our national government has seemed to me to be on the eve of an important change of policy in its aims and ideals. It has shown an ever-growing disposition to break away from our early habit of political isolation, and to assert itself in the rivalries of the worlds politics.
