

Why Regions Matter: Small Worlds in Comparative Perspective

Bringing together experts on regionalism and federalism this collection explores the impact of legislative regions on parties and voters. It reflects on the 1980 publication of *Small Worlds* by David Elkins and Richard Simeon, which outlined how and why voters and policies differ across Canadian provinces. Using recent data, the essays in this collection provide a comparative re-examination of the impact of regions. The book explores attitude divergence in Canada and in the US, the role and impact of regional parties in Quebec, Scotland and Bavaria, the impact of multi-level governance on how citizens understand and discharge their duties and the capacity of sub-state political systems to influence general political attitudes. The result is an empirical and analytical contribution to regionalism and federalism studies that demonstrates how and why regions matter. This book was published as a special issue of *Regional and Federal Studies*.
